**A new dimension of  
QUALITY**

**AUX**  
AIR CONDITIONER

## **AUX - About the brand** Intelligent & Healthy Living

The AUX Group, operating on the market since 1986, is one of the leading producers of smart home appliances, including mainly air conditioners. The group has 10 modern manufacturing bases - largest in Ningbo, Nanchang and Tianjin, China - and 5 research and development centers. AUX devices are available in over 180 countries around the world. Thanks continuous R&D investment, the AUX brand can offer competitive, technologically advanced and stylistically attractive products that meet the highest quality standards and European energy efficiency requirements.

## Residential air conditioners RAC - stylish, comfortable, energy-saving solutions for houses and flats.

Wall-mounted AUX units combine modern technological solutions, functionality and high-quality design. All AUX devices operate on the basis of the latest, environmentally friendly R32 refrigerant and inverter technology, thanks to which they achieve high energy efficiency parameters. They have the energy efficiency class A ++ in cooling mode and A + in heating mode. The standard equipment of indoor units includes an advanced air ionizer that will take care of the health and safety of users and a Wi-Fi 2.0 control module plugged into the air conditioner via a USB plug - an effective and easy to install solution that allows you to control the operation of the unit using mobile devices.

## Modern, sophisticated design.

The range of AUX room air conditioners includes solutions for every interior. From the universal styling of the Freedom series, through the ultra-modern, sophisticated design of the J-Smart series to the luxurious, elegant form of the Halo series models. The design of the J-Smart series has been awarded the prestigious **IF Design Award 2019**.

## Built-in Wi-Fi module - convenient and simple control from anywhere in the world.

All AUX wall-mounted models are equipped with a Wi-Fi module as standard equipment. The Halo, Halo Deluxe, J-Smart and J-Smart ART series remain equipped with a Wi-Fi 2.0 module plugged into the air conditioner with a USB plug. It is an easy-to-install solution that allows you to control the device's operating parameters using mobile devices, even while you are outside the home or the office where the air conditioner is installed.

### AC Freedom application.

To control the air conditioner via Wi-Fi, it is necessary to install the AC Freedom application on the mobile device. The application allows you to control multiple devices and save individual parameters for each of them, such as operating mode, temperature settings and fan speed level. The user-friendly and easy-to-use interface of the application ensures maximum convenience of device control. The app is available for download from the Google Play Store (for Android) and Appstore (for iOS).

## Advanced filtration system - clean and safe air in your home.

Wall-mounted AUX units have a built-in multi-stage filtration system that ensures clean and safe air in an air-conditioned room. Larger contaminants such as dust and dust particles are effectively captured by the primary air filter. Depending on the model, it is a honeycomb filter (Freedom series) or a high-density filter mesh filter (J-Smart and Halo series). The standard equipment of all wall-mounted units includes a Cold Plasma ionizer and an antibacterial filter, and the J-Smart and Halo series models additionally have a built-in PM2.5 filter. Standard equipment of air conditioners can be supplemented with a number of optional filters providing advanced protection against a specific type of contamination.

- 
**UV Sterilization**
- 
**Honeycomb filter\***
- 
**Antibacterial filter**
- 
**Multi-stage air filtration system**  
 active carbon filter, silver ion filter, antibacterial filter, filter with vitamin C, PM2.5 filter
- 
**Built in air ionizer**
- 
**Increased density filter**
- 
**PM2.5 filter**

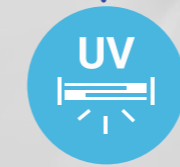

**Movable air louvers**

Movable vertical and horizontal air louvers of the AUX indoor units allow for precise adjustment of the air flow direction and ensure even distribution of cooled air throughout the room.

**Built-in Wi-Fi module**

All AUX wall-mounted models are equipped with a Wi-Fi module as standard, enabling convenient and simple control of the air conditioner operation using mobile devices from anywhere in the world.

**UV sterilization**

**Multi-stage air filtration system**

**Built in air ionizer**

### UV sterilization

The highest models of the Q-Smart series are equipped with UV lamps that guarantee clean and healthy air. UV sterilization effectively cleans the air by eliminating viruses, fungi and microbes. This function is especially recommended for allergy sufferers and people susceptible to infections.

### Multi-stage air filtration system

The multi-stage filtration system ensures clean and safe air in an air-conditioned room. Coarse dirt, such as dust and dust particles, are captured by the primary air filter (honeycomb or high-density filter \*\*). The standard equipment of the units also includes, depending on the model, an antibacterial filter and a PM2.5 \*\*\* filter.

### Built in air ionizer

All AUX wall mounted units are equipped with the Cold Plasma ionizer as standard, which effectively eliminates fine dust particles, viruses, bacteria, mites, mold, pollen and other allergens, and even cigarette smoke from the air. It also reduces unpleasant odors.

**Advanced self-cleaning**

Thanks to the self-cleaning function, the inside of the air conditioner is kept clean by eliminating moisture and inhibiting the growth of bacteria, mold and unpleasant odors on the heat exchanger. This guarantees the user a clean and safe environment.

**Intelligent self-diagnosis**

All AUX devices monitor malfunctions on an ongoing basis and switch off in the event of a failure. An error code appears on the display of the indoor unit indicating the type of failure, which greatly simplifies service operations.

\*\* Freedom series models have a basic honeycomb air filter. Models from the J-Smart, J-Smart ART, Halo, Halo Deluxe, Q-Smart Premium, Q-Smart Premium Grey series are equipped with an increased density filter.

\*\*\* Freedom and Q-Smart series models have an antibacterial filter as standard. The models in the J-Smart, J-Smart ART, Halo, Halo Deluxe, Q-Smart Premium, Q-Smart Premium Grey series have an antibacterial filter and PM2.5 as standard.

**Anti-corrosion coated casings**

The casing for the outdoor unit has been covered with a number of protective layers, protecting it against insects, rodents, moisture, dust and fire. This ensures a long service life of the device and an aesthetic appearance, even after many years of exposure to unfavorable environmental conditions.

**High-quality inverter compressor**

The inverter rotary compressor used in AUX air conditioners guarantees reliable and efficient operation of devices and the highest energy efficiency parameters. It also ensures low operating costs and low generated noise level. Durable, high-quality materials used in the design of the compressor ensure its long and trouble-free operation.

## Portable air conditioner - effective and comfortable cooling without the need for specialist assembly.

Portable AUX air conditioners will prove themselves wherever it is not possible to install traditional split air conditioning. They do not require specialized installation - warm air is discharged from the room through an exhaust pipe that can be mounted in a window or in a wall. They are distinguished by mobility - the device can be easily moved to another room at any time, thanks to the wheels attached to the base of the casing.

## Portable air conditioner MI Series

<b>Model</b>	<b>AUX-12MI</b>	
<b>Cooling capacity</b>	[kW]	3,40
<b>Power</b>	[V~,Hz,Ph]	220-240, 50, 1

<b>Weight (netto / brutto)</b>	[kg]	33,0 / 38,0
<b>Temperature setting range</b>	[°C]	16 ~ 32
<b>Refrigerant type</b>	-	R290

Specifications, appearance and functions are subject to change without prior notice.

## Multi split systems

- flexible air conditioning solutions for many rooms.

The multi split AUX system allows the installation of 2 to 5 indoor units to one unit. The offer includes 6 models of outdoor units with a cooling capacity from 4.1 to 12.0 kW. The devices operate using ecological R32 refrigerant and modern inverter technology, guaranteeing reliability and energy efficiency. They offer stable operation over a wide range of outdoor temperatures, ranging from -15 °C to 52 °C for cooling mode and -20 °C to 24 °C for heating mode. The system allows the use of cooling installations with a total length of up to 80 meters, depending on the power of the aggregate, and elevations up to 15 meters.

# Multi system

- saving installation space and high flexibility.

The multi split AUX system allows you to connect 2 to 5 indoor units to one unit. This allows for a reduction in the number of needed outdoor units in comparison with single systems, and thus a significant space saving on building facades, roofs and balconies. In addition, the devices do not have to be installed at the same time - the system can be expanded with new indoor units over time, maintaining the appropriate performance parameters of individual elements of the air conditioning system.

## Multi split system - saving installation space and large flexibility.

The multi split AUX system allows you to connect 2 to 5 indoor units to one unit. This allows for a reduction in the number of necessary outdoor units in comparison with single systems, and thus a significant space saving on building facades, roofs and balconies. In addition, the devices do not have to be installed at the same time. The system can be expanded with new indoor units over time, maintaining the appropriate performance parameters of individual elements of the air conditioning system.

Five indoor units in a single split system.

Five indoor units in a multi split system.

## Wide choice of indoor units - always good fit.

The AUX series of multi devices includes as many as 6 types of indoor units - cassette, duct, floor-ceiling and three models of stylish wall-mounted units (Freedom, J-Smart and J-Smart ART series). They are available in various variants of cooling capacity - from 2.05 to 7.03 kW. Such a wide selection allows the units to be well adapted to the size and nature of the room and the needs of users.

## Commercial air conditioners CAC - efficient solutions air conditioning for utility buildings.

The AUX series of commercial air conditioners, intended for utility facilities such as offices, shops, restaurants and hotels, includes three types of units - duct, cassette and floor-ceiling units. Commercial AUX systems work with R32 refrigerant and a highly efficient inverter compressor, ensuring reliable operation even at very low ambient temperatures down to -20 °C. All units in the CAC series achieve the high energy efficiency class A++ for cooling and A+ for heating.
